

MindSOC

AI-Powered SOC Automation Platform

Investigation Timeline

Classify 08:58:06
Escalate the brute_force alert with high severity.

Investigate 09:01:32
Searched knowledge base for brute_force patterns. Found 3 matching articles.

Enrich 09:04:18
Enriched 2 entities via visual and threat intel connectors.

Synthesis 09:07:45
Investigation determined this as a genuine security incident. The brute force activity from source 'Wazuh' was validated through multi-source enrichment. Recommended immediate response actions have been generated.

Recommended Actions

Block source IP firewall

Force password resets on compromised accounts

Enable account lockout policy

Faster Response

Reduces MTTR by 87% with autonomous investigations in under 3 minutes.

Higher Accuracy

Delivers 95–99% verdict accuracy and auto-closes 90%+ false positives.

Enterprise-Ready

Runs securely on-premise/VPC with RBAC, audit logging, and SOC2 compliance preparation.

Transform Your Security Operations MindSOC unifies alerts across SIEM, EDR, ITSM, Threat Intel, and Identity providers, applying AI-driven correlation and root-cause analysis. It autonomously investigates incidents through a five-stage pipeline, delivering complete verdicts directly into ticketing systems. By reducing alert fatigue and accelerating decision-making, MindSOC empowers SOC teams to respond faster, more accurately, and with full governance.

Uncompromising Control and Compliance

MindSOC runs securely inside your infrastructure, supporting VPC, on-premise, and air-gapped deployments. All data remains within your network boundary to meet strict compliance requirements.

Performance Boost

Investigations run 20x faster, cutting MTTR below 20 seconds and driving up to 3x ROI, giving SOC teams the speed and efficiency.

Accuracy Assurance

Delivers 99%+ verdict accuracy and auto-closes 95%+ false positives, reducing analyst fatigue and keeping focus on real threats.

Compliance Traceability

Provides timelines, causal graphs, and audit logs to strengthen compliance monitoring and ensure transparent oversight.

Enterprise Scalability

Handles 10,000+ incidents daily, supports 100+ concurrent investigations, and seamlessly scales to unlimited users and assets.

Flexible Plans for Every Organization

Available in Essential, Premium, and Enterprise tiers, suited for SOC teams from small groups to MSSPs. Deployment spans Docker Compose to Kubernetes clusters, with add-ons like GPU acceleration, extended retention, compliance support, and 24/7 assistance.
